CLAIMS

WO 2005/092291

1. Prolonged-release compositions containing torasemide as active ingredient and a matrix-forming polymer.

5

- 2. Prolonged-release compositions according to claim 1, wherein these compositions are tablets for oral administration.
- 10 3. Prolonged-release compositions according to claim 1 and 2, wherein the matrix-forming polymer is selected from the group of polymers consisting of acrylic acid, cellulose, glycerol behenate, guar gum, xanthan gum, chitosan, gelatin, polyvinyl alcohol and the like, and mixtures thereof.
 - 4. Prolonged-release compositions according to claim 3, wherein the acrylic matrix-forming polymer is selected from the group consisting of acrylic acid polymers and the like, and derivatives and mixtures thereof.
- Prolonged-release compositions according to claim 3, 5. cellulose matrix-forming polymer wherein the is of the consisting group 25 selected from methylcellulose, hydroxypropylmethylcellulose, carboxymethylcellulose, hydroxyethylcellulose, like, and their pharmaceutically acceptable the salts, and mixtures thereof.

30

20

6. Prolonged-release compositions according to claim 3, wherein the matrix-forming polymer is guar gum.

11

PCT/EP2005/051340

- 7. Prolonged-release compositions according to preceding claims, wherein torasemide is present in a proportion from 0.5 to 20%.
- Prolonged-release compositions according to claim 7, wherein torasemide is present in a proportion from 4 to 10 %.
- 9. Prolonged-release compositions according to preceding claims, wherein the matrix-forming polymers are present in a proportion from 1 to 50 %.
 - 10. Prolonged-release compositions according to claim 9, wherein the matrix-forming polymers are present in a proportion from 2 to 40%.
 - 11. Prolonged-release compositions according to preceding claims comprising in addition one or more excipients selected from the group consisting of diluents, binders, disintegrants, lubricants, and the like.
- 12. Prolonged-release compositions according to claim
 11, wherein, the diluents are selected from the
 group consisting of lactose, celluloses, mannitol,
 calcium phosphate, and the like, and the mixtures
 thereof.
- 13. Prolonged-release compositions according to claim
 30 11, wherein, the binders are selected from the group
 consisting of Aerosil® 200, starch, and the like, and
 mixtures thereof.
- 14. Prolonged-release compositions according to claim 11, wherein, the disintegrants are selected from the

12

group consisting of Aerosil® 200, starch, and the like, and mixtures thereof.

15. Prolonged-release compositions according to claim
5 11, wherein, the lubricants are selected from the
group consisting of magnesium stearate, talc, and
the like, and mixtures thereof.
